

Thank You, Senators Manchin and Capito

For Standing with West Virginia's Tipped Workers

"I make a lot more than minimum wage, which helps me and my family tremendously."

Kayla, Server

"Any change to the tip credit would have a negative impact on my wages and reduce my take-home pay."

Britt, Bartender

"The tipped wage system is empowering for women, helping us maximize our income—which is far greater than minimum wage."

Crystal, Server

"I have been working as a tipped employee for my entire working life. Nothing with the system is broken. Don't try and 'fix' it."

Debbie, Server

"The tips I make provide a great living. Changing the tipped wage system would be a lose-lose-lose situation—for the customer, employee, and employer."

Jeffrey, Bartender

"I am on Social Security, and having the extra money is helpful. The tips end up being better than minimum wage."

Laura, Server

Past attempts to increase the tipped wage have led to reductions in tip income and fewer jobs. That is why thousands of servers support the current system.
